CRICKSTATS

MODULE 5 - PROJECT DEVELOPMENT

Step 1: Create Salesforce Developer Account

Slide 1/5

01 — Sign Up

Visit developer.salesforce.com to create your free Developer Edition account

02 Verify Your Account

Check your email inbox and click the verification link to confirm and activate your account

03 — Log In

Use your registered email & password to log in to the Developer Console

CRICKSTATS • BCA Project — Module 5: Project Development

Tip: Developer Edition is free & includes full Salesforce platform for testing!

CRICKSTATS

MODULE 5 - PROJECT DEVELOPMENT

Step 2: Create Custom Objects

Custom Object 1: Player

Stores player details & stats

Setup | Object Manager

Details | Fields & Relationships | Layouts

Label: Player
API Name: Player__c

Standard Fields:

- Owner
- Created By
- Last Modified By

Custom Fields:

Player_Name__c	Text(80)	Required
Jersey_Number__c	Number(2,0)	Unique
Batting_Average__c	Number(5,2)	Decimal
Bowling_Strike_Rate__c	Number(5,2)	Decimal
Team__c	Picklist	Values: Batting, Bowling, All-Rounder

Key: Player is the core object linked to Match Performance via Lookup

Custom Object 2: Match Performance

Tracks match-by-match player performance

Setup | Object Manager

Details | Fields & Relationships | Layouts

Label: Match Performance
API Name: Match_Performance__c

Custom Fields:

Match_Date__c	Date	Required
Runs_Scored__c	Number(4,0)	Default: 0
Wickets_Taken__c	Number(2,0)	Default: 0
Overs_Bowled__c	Number(3,1)	Decimal
Player__c	Lookup (Player)	Required

Key: Lookup relation to Player enables reporting & analytics per player

Relationship: Match Performance → Player is a Lookup relation, allowing 1 Player to have many Match Performances

Tip: Enable Reports & Dashboards when creating objects to track stats!

Slide 3/5

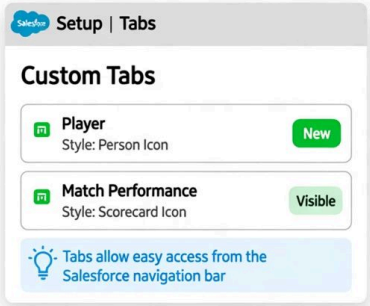

CRICKSTATS

MODULE 5 - PROJECT DEVELOPMENT

Step 3: Create Tabs & Lightning App

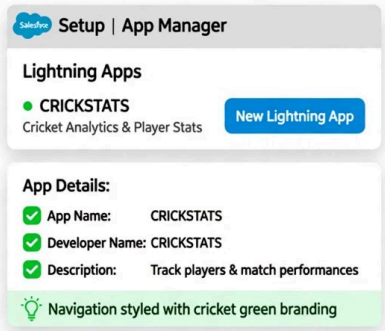

01 Create Custom Tabs

Create tabs for Player & Match Performance

02 Create Lightning App

Build the CRICKSTATS Lightning App

03 Configure via Lightning App Builder

Add Tabs & Navigation Items

Outcome: CRICKSTATS app is now available in App Launcher for users to access Player & Match Performance

Tip: Order navigation items to highlight Player & Match Performance first for easy access!

CRICKSTATS

MODULE 5 - PROJECT DEVELOPMENT

Step 4: Create Fields & Relationships

Slide 4/5

Player Object — Custom Fields

Enhance Player with custom picklists & formula fields

Setup | Player | Fields & Relationships

- **Team_Role__c** | Picklist
  - Values: Batsman, Bowler, All-Rounder, Wicketkeeper
- **Performance_Rating__c** | Formula (Number 5,2)
  - `IF( Batting_Average__c > 25, 3, 1 ) )`
  - Rates player performance based on batting average
- **Is_Active__c** | **Checbox** (Default: TRUE)
- **Contact_Email__c** | Email
  - Formula fields auto-calculate to show insights without manual entry

Match Performance Object Fields & Relationship

Link matches to players + add calculated fields

Setup | Match Performance | Fields & Relationships

- **Player__c** | Lookup (Player) | Required
  - Lookup relationship: each Match Performance record links to 1 Player record
- **Strike_Rate__c** | Formula (Percent)
  - `( Runs_Scored__c / Overs_Bowled__c ) * 100`
  - Calculates strike rate as %
- **Match_Result__c** | Picklist
  - Values: Won, Lost, Tie, No Result
- **Player_of_Match__c** | Checbox
  - Roll-up summaries can be added later to show total runs per player

Player
Player__c (Parent)

→ Lookup Relationship →

Match Performance
Match_Performance__c (Child)
One Player ⇉ Many Match Performances.
Enables filtering, reporting, and roll-up summaries on player performance stats.

Benefits: Enables reports like Avg Runs by Player, Top 5 Performers, Match Win Rate

Tip: Use Validation Rule to ensure Runs_Scored ≥ 0 and Overs_Bowled > 0

Slide 5/5 Final

CRICKSTATS

MODULE 5 - PROJECT DEVELOPMENT

Step 5: Roll-up Summary & Salesforce Flows

Roll-up Summary Fields

Aggregate data from Match Performance → Player

Setup | Player | Roll-up Summary Fields

Total_Runs__c | Roll-up Summary (SUM)

Summarizes: Match Performance → Runs_Scored__c

Total Runs: 1285

Total_Wickets__c | Roll-up Summary (SUM)

Summarizes: Match Performance → Wickets_Taken__c

Total Wickets: 52

Roll-up summaries update automatically when Match Performance records are added/edited

Salesforce Flow (Automation)

Auto-calculate average & strike rate on record save

Flow Builder | Update Player Stats Flow

Record-Triggered Flow

When: Match Performance is Created or Updated

↓

Update Related Player Record

- Recalculate Batting_Average__c = Total_Runs__c / Matches_Played__c
- Recalculate Strike_Rate__c = (Runs_Scored__c / Overs_Bowled__c) * 100

↓

Save to Player Record

Flow runs automatically — no manual updates needed. Keeps stats always current!

Project Success: CRICKSTATS Module 5 Complete!

Roll-ups & Flows now automate all player performance calculations, enabling real-time analytics & reporting.

Automated Stats | Real-time Updates | Ready for Reports & Dashboard

CRICKSTATS • All data now dynamically updated via Salesforce automation — No manual entry required
